

Multimedia

⚠ Issues & Corrections

1. ❌ Incorrect file extension for audio

```
<source src="aud/horse.ogv" type="audio/ogg">
```

- **Issue:** `.ogv` is typically used for video, not audio.
- **Fix:** Use `.ogg` for audio:

```
<source src="aud/horse.ogg" type="audio/ogg">
```

2. ❌ Accidental backtick in video tag

```
<video controls autoplay muted>  
'  <source src="vid/mov.mp4" type="video/mp4">  
</video>
```

- **Issue:** The backtick (`) is likely a typo and may break rendering.
- **Fix:** Remove the backtick.

3. 🧠 Missing fallback text

If the browser doesn't support the media type, users see nothing. Add fallback content:

```
<audio controls>  
  <source src="aud/horse.ogg" type="audio/ogg">  
  Your browser does not support the audio element.  
</audio>  
  
<video controls autoplay muted>  
  <source src="vid/mov.mp4" type="video/mp4">  
  Your browser does not support the video tag.  
</video>
```

4. Optional: Add width to video

To prevent oversized video rendering:

```
<video controls autoplay muted width="480">
```

Suggested Corrected Version

```
<!DOCTYPE html>
<html>
<head>
  <title>Multimedia Elements</title>
</head>
<body>

  <audio controls>
    <source src="aud/horse.ogg" type="audio/ogg">
    Your browser does not support the audio element.
  </audio>

  <br/>

  <video controls autoplay muted width="480">
    <source src="vid/mov.mp4" type="video/mp4">
    Your browser does not support the video tag.
  </video>

</body>
</html>
```
