

Registration mini-form

⚠ Areas to improve

1. Extra space in `for="fname "`

```
<label for="fname ">Full Name:</label>
```

- **Issue:** The space after `"fname "` breaks the label–input association.
- **Fix:** Remove the space → `for="fname"`

2. Label–input association for radios

Currently:

```
<label><input type="radio" id="morning" name="session" value="Morning"/>Morning</label>
```

- **Better practice:** Use `for="morning"` in the label and move the input outside:

```
<input type="radio" id="morning" name="session" value="Morning">
<label for="morning">Morning</label>
```

- **Why:** This improves accessibility and makes the label clickable even if the input is styled separately.

3. Capitalization and spelling

- **Legend text:** `"preferred session"` → should be `"Preferred Session"`
- **Consistency:** `"evening"` vs `"Morning"` → match casing in both `value` and label.

4. Placeholder vs label clarity

- **Tip:** Remind students that `placeholder` is not a substitute for a visible label. They've used both, which is good — just reinforce why labels must remain visible.
