

Skills Declaration Form

🛠 Areas for Improvement

1. Extra space in `action="# "`

```
<form action="#" method="get">
```

- **Issue:** The space after `#` is unnecessary and may cause unexpected behavior.
- **Fix:** Change to `action="#"`

2. Label nesting for radio and checkbox inputs

Currently:

```
<label><input type="radio" id="call" name="contact" value="call"/>Call</label>
```

- **Better practice:** Separate the label and input, and use `for="call"`:

```
<input type="radio" id="call" name="contact" value="call">
<label for="call">Call</label>
```

- **Why:** Improves accessibility and makes the label fully clickable.

3. Capitalization consistency

- `Nic:` → should be `NIC:` for clarity and standardization.
- `Preferred Contact` and `Preferred Subjects` legends are great — just ensure consistent casing across all labels and values (e.g., `value="Call"` vs `value="call"`).

4. Spacing between checkboxes

All checkboxes are currently inline:

```
<label><input type="checkbox" . . . /> HTML</label>
<label><input type="checkbox" . . . /> Python</label>
```

- **Suggestion:** Add `
` after each for better readability:

```
<label><input type="checkbox" . . . /> HTML</label><br/>
```

✓ Suggested Revised Version

```
<form action="#" method="get">
  <label for="fname">Full Name:</label>
  <input type="text" id="fname" name="fname" placeholder="Enter your full name" /> <br/>

  <label for="nic">NIC:</label>
  <input type="text" id="nic" name="nic" placeholder="Enter your NIC" /> <br/>

  <fieldset>
    <legend>Preferred Contact</legend>
    <input type="radio" id="call" name="contact" value="Call">
    <label for="call">Call</label> <br/>

    <input type="radio" id="mail" name="contact" value="Email">
    <label for="mail">Email</label> <br/>

    <input type="radio" id="whatsapp" name="contact" value="WhatsApp">
    <label for="whatsapp">WhatsApp</label> <br/>
  </fieldset>

  <fieldset>
    <legend>Preferred Subjects</legend>
    <input type="checkbox" id="html" name="subject[]" value="HTML">
    <label for="html">HTML</label> <br/>

    <input type="checkbox" id="python" name="subject[]" value="Python">
    <label for="python">Python</label> <br/>

    <input type="checkbox" id="sql" name="subject[]" value="SQL">
    <label for="sql">SQL</label> <br/>

    <input type="checkbox" id="css" name="subject[]" value="CSS">
    <label for="css">CSS</label> <br/>
  </fieldset>

  <input type="submit" id="submit" value="Submit" />
</form>
```
